TROPICAL REEF LIFE: A MARINE AWARENESS GUIDE

by Michael Aw

Published for

OceanNEnvironment Ltd, 1997

ISBN: 0-646-31014-3

In this book you will discover more about the more prominent members of the coral reef societies; their choice of homes, their habits, their social hierarchy within the

intricacies of everyday life on the reef. Some of them are capable of striking faster than a bullet, some have super-visionary power while some species are like legends and heroes; undertaking ultimate sacrifices so that their next generation may live. Some practice parental care while some adopt a solitary lifestyle. A Marine Awareness Guide to Tropical Reef Life is only a brief insight into their world. It is hoped that this book will enhance and develop your enthusiasm to explore the coral reef life of the Indo-Pacific Realm.

Also provided are some tips on underwater photography.

WHAT WORKS: A GUIDE TO ENVIRONMENTAL EDUCATION AND COMMUNICATION PROJECTS FOR PRACTITIONERS AND DONORS

Edited by Martha C. Monroe

Academy for Educational Development, 1999

ISBN: 0-86571-405-3

This book highlights not only the differences in medium, scale, and context of environmental education and communication (EE&C) projects but also the strong similarities among successful EE&C activities. It presents examples of strategies that work and guidelines for developing new projects. It is intended to provide program developers, manag-

ers, and funders with some concrete ideas about what works, what should be avoided, and how funding might be provided to EE&C efforts.

As many as 50 different presenters described their education and communication projects.

The cases offer a glimpse at a wide variety of successful environmental efforts around the world.

ECOSYSTEM MANAGEMENT: LESSONS FROM AROUND THE WORLD: A GUIDE FOR DEVELOPMENT AND CONSERVATION PRACTITIONERS

Edited by J. Y. Piro, P. J. Meynell & D. Elder

IUCN, 2000

ISBN: 2-8317-0542-8

This Guide was commissioned by the World Bank Environment

Department and prepared by IUCN-The World Conservation Union to enable natural resources managers to benefit from the lessons learned by other development practitioners

and conservation organizations.

This Guide aims to encourage a wider understanding of the concepts of ecosystem and natural habitat management through the practical experience gained from 24 different field projects. It is based on a review of the institutional, technical and operational profiles of a number of carefully selected projects from around the world. It also provides practical information on how to integrate them into projects in the field.

A MANUAL FOR WILDLIFE RADIO TAGGING

by Robert E. Kenward

Winfrith Technology Centre, 2001

ISBN: 0-12-404242-2

This Manual is aimed at first-time users who need to know about the controls on receivers before using them in the field, and who might not understand a

discussion on data analysis before learning about tracking techniques. It describes the performance to be expected of radio tags and discusses the planning that is necessary for successful projects.

It also discusses a wide variety of tag mounting techniques, the principles and techniques used for radio tracking on foot, or in cars, boats or aircrafts. Systematic collection of data and analyses for these behavioral and demographic data are likewise included.

GUIDELINES FOR ESTABLISHING MARINE PROTECTED AREAS

by Graeme Kelleher &

Richard Kenchington

IUCN, 1992

ISBN: 2-8317-0105-8

These Guidelines are intended primarily to help nations and states to establish national representative systems of Marine Protected Areas as a vital component of integrated management of their coastal marine areas.

The Guidelines provide detailed prescriptions which allow production of a plan for the establishment of a national representative system of Marine Protected Areas in accordance with IUCN Resolution 17.38.
